PROJECTS

English Country Agri Website using wordpress ⬈
A specialized platform for medicinal and aromatic herbs and palm cultivation

Developed a professional website for English Country Agri, a company with diverse investment activities primarily focused on **medicinal and aromatic herbs and palm cultivation**. The website showcases the company's use of the latest scientific and technical methods across all agricultural stages—from planting and care to harvesting, processing, packaging, and marketing both locally and internationally.

SKN Clinics Website Using WordPrees
A comprehensive online platform for booking skincare and cosmetic services.

Developed a modern and user-friendly website for SKN Clinics, the leading beauty and skincare destination in Riyadh. The platform enables clients to easily book various skincare treatments—such as deep cleansing, impurity removal, and other cosmetic services—under the supervision of a large team of specialized doctors and skincare experts.

Smart Attendance & Check-In System Using n8n Workflow ⬀

An automated employee attendance system using web forms, location tracking, and Google Sheets integration.

Designed and implemented a fully automated attendance and check-in system for internal company use. The system enables employees to register their exact check-in and check-out times through a simple web form, which requests permission to capture the user's live location for accurate on-site verification. All attendance data—including timestamps and geolocation—is automatically recorded and organized in Google Sheets using custom **n8n workflows**, providing a flexible and efficient alternative to traditional biometric systems.

Mthlth Real Estate Website Using WordPress ⬀

A real estate investment platform for market news and consultancy booking.

Developed an informative and interactive website for Muthallath Real Estate, an investment company providing insights into the latest trends and updates in the Saudi real estate market. The platform allows visitors to stay up to date with market news and conveniently book professional real estate consultations online.

Shash Medical E-commerce Website Using WordPress ⬀

A specialized online store for hard-to-find medical supplies in Saudi Arabia.

Developed a comprehensive e-commerce platform for Shash Medical, an online store dedicated to providing a wide range of essential and hard-to-find medical supplies. The store serves the Saudi market and offers customers multiple secure payment options, ensuring reliable access to high-quality medical products anytime, anywhere.

Sharkas Store E-commerce Website ⬀

An online store for electrical tools and equipment with multi-currency and global shipping.

Developed a full-featured e-commerce website for Sharkas Store, a specialized online shop offering a wide range of electrical tools and equipment. The platform is designed to support multiple currencies and provides worldwide shipping options, making it easy for customers from different countries to purchase and receive high-quality products reliably.

Pyramids Trip Website Using Wordpress ⬀

A booking platform for Egypt travel packages and tours.

Developed a dynamic travel booking website for Pyramids Trip, offering visitors the chance to explore Egypt's top attractions—including the iconic Pyramids, Luxor temples, and Nile River cruises. The platform provides seamless travel planning and booking experiences, curated by local experts to ensure an enriching and memorable Egypt vacation.

Employee Learning Management System (Laravel) ⬀

Built a secure and scalable employee training system using **Laravel**, **MySQL**, and **Blade**. Features included **JWT authentication**, course and quiz management, progress tracking, user-friendly dashboard, automated certificate generation, and clean, well-documented code. A detailed **README** was added on GitHub for easy setup and contribution.

EasyEstates (Laravel -Angular) ⬀

Modern Real Estate Listing Platform Built with Laravel & Angular

EasyEstates is a web-based application designed to simplify the process of listing and selling properties. Developed using Laravel and Angular, it provides an efficient and user-friendly interface for both sellers and buyers. The platform enables smooth communication, fast property viewings, and a streamlined sales process—making it an ideal tool for real estate professionals and individuals alike.

Labinah – Construction & Building Services Platform ⬀

A Construction Company Website built with WordPress

Developed a WordPress-based platform for a construction company, allowing users to request real estate consultations and explore services through a responsive, user-friendly interface with customized design and functionality**.**

Product Display Page using API & JavaScript ⧉
Developed a dynamic web page that fetches and displays products from an external API using **JavaScript (Fetch API/AJAX)**.

Memory Game using JavaScript ⧉
Developed an interactive **Memory Card Game** using **JavaScript, HTML, and CSS**. The game challenges players to match pairs of cards within a time limit, enhancing concentration and memory skills.

E-Commerce Web Application ⧉
Developed a fully functional **E-Commerce web application** using **Angular** for the front end. The platform is integrated with a **RESTful API** to fetch real-time product data, manage user authentication, and process orders. Users can browse products, add items to the cart, and complete secure transactions.

E-commerce Store using WordPress
Developed a fully functional e-commerce store using **WordPress** and **WooCommerce**, leveraging advanced page-building tools like **Elementor** and **Forminator** to enhance the user experience. Implemented custom design elements, optimized site performance.

Personal Portfolio Website using WordPress
Designed and developed a **personal portfolio website** using **WordPress**, featuring four main pages: Home, About Me, Projects, and Contact. Utilized **Elementor** for a visually appealing and responsive design, and **Forminator** to create an interactive contact form.
